

# Beveled Oval Mirror

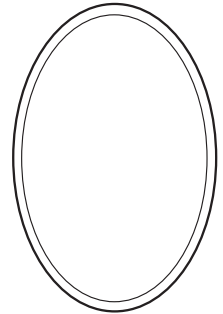

Installation is as easy as 1, 2, 3!

① Locate the screw and anchor that are included in the box.

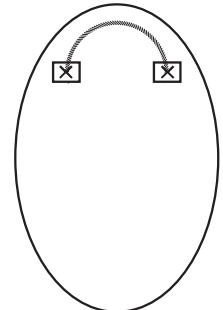

② Install screw into a stud in desired location on the wall. When a stud is not available, use provided wall anchor.

Note: Measuring the distance between the top of the mirror and the top of the wire (when pulled tight) will help determine the screw's location on the wall.

③ Hang mirror onto wall from wire located on the back of the mirror.
